Advanced Technologies Center

Venue
Description

ASHGABAT, TURKMENISTAN

Advanced Technologies Center (ATC)

Professional Venue & Training Platform for the Energy Industry

The Economic Society “Kamil Tilsimatlar Merkezi” – Advanced Technologies Center (ATC) provides modern conference facilities and specialized professional training services designed to support engagement within the energy sector.

ATC offers fully equipped venues for conferences, executive meetings, technical workshops, industry seminars, and professional training programs. The center serves international energy companies, government institutions, service providers, and industry experts operating in Turkmenistan.

Located in close proximity to key national oil & gas concerns (SC “Turkmengas”, SC “Turkmennebit”, SC “Turkmengeology”), ATC offers a professional environment where companies and organizations can conduct forums & exhibitions, meetings, technical discussions, and capacity-building programs.

By combining modern infrastructure, professional event support, and industry-focused training programs, ATC provides a platform that supports knowledge exchange and collaboration within the energy sector.

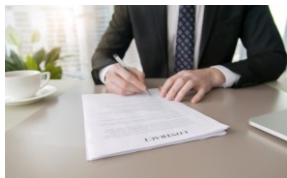

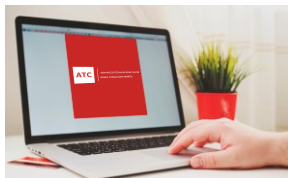

Scientific Research Institute of Natural Gas of the
SC “Turkmengas”, Archabil Avenue, 58, 6th floor

Why International Energy Companies Hold Events in Ashgabat

Turkmenistan possesses some of the world's largest natural gas resources and remains an important participant in regional and global energy markets. The country continues to attract international operators, service companies, technology providers, and financial institutions engaged in long-term energy development projects.

Ashgabat serves as the administrative and operational center of the national energy sector, hosting ministries, regulatory institutions, and the headquarters of major national energy companies.

For international companies operating in the region, organizing meetings, technical workshops, and training programs in Ashgabat provides valuable opportunities to engage with industry stakeholders and decision-makers.

The Advanced Technologies Center (ATC) provides a professional venue where companies can organize:

- executive meetings and strategic discussion
- technical workshops and engineering seminar
- professional training programs and capacity-building sessions
- industry conferences and expert roundtables
- forums & exhibitions

ATC supports industry dialogue, professional development, and cooperation between international companies and local institutions.

Conference & Event Facilities

► The Ideal Venue for Industry Events

ATC offers modern, fully equipped facilities designed to host business events of any scale — from executive meetings and technical workshops to international conferences and training programs.

Our conference spaces are designed to ensure the smooth and professional organization of events.

Facilities include:

- high-speed internet connectivity
- professional projection and presentation systems
- modern sound equipment
- comfortable conference seating arrangements
- simultaneous interpretation booths and equipment

Professional interpreters can also be arranged upon request to support **multilingual international events.**

Our team provides support throughout all stages of event preparation and execution.

Why Choose ATC?

► Variety of Conference Halls

ATC offers a range of conference spaces suitable for different event formats — from executive meetings and workshops to large industry conferences.

The facilities can accommodate **events from 10 to over 400 participants**, with flexible seating arrangements adapted to the requirements of each event.

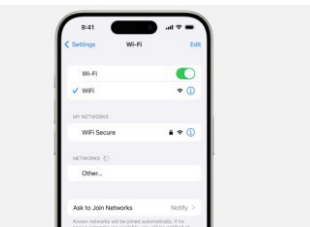

► Modern Technical Infrastructure

All conference halls are equipped with professional presentation technologies, including:

- high-definition projectors and large presentation screens
- professional sound systems and microphones
- flip charts and presentation tools
- high-speed Wi-Fi connectivity
- simultaneous interpretation booths and translation systems

These facilities create a professional environment suitable for international conferences, technical workshops, and executive meetings.

Strategic Location & Turnkey Event Services

► Strategic Location

ATC is conveniently located near **Turkmenistan's key energy institutions**, including ministries and national oil and gas companies.

This proximity allows industry professionals and government specialists to participate in meetings, training sessions, and conferences **without significant disruption to their daily schedules**.

The venue also benefits from convenient transport access and nearby parking facilities.

► Turnkey Event Solutions

ATC provides comprehensive **turnkey event services**, enabling clients to organize conferences, seminars, and professional meetings efficiently.

Services include:

- event planning and coordination
- conference logistics and registration management
- technical equipment setup and on-site support
- simultaneous interpretation services upon request
- catering services including coffee breaks, business lunches, and formal dinners

Platform for Industry Dialogue

ATC serves as a platform supporting professional exchange between government institutions, international energy companies, service providers, and academic experts.

The center contributes to industry dialogue on topics including:

- technological innovation in oil and gas operations
- sustainable development of energy resources
- methane emissions monitoring and environmental performance
- operational efficiency across upstream and downstream sectors
- global energy market trends and industry developments

Through conferences, technical sessions, and training programs, ATC supports knowledge sharing and professional capacity development within the energy sector.

Turkmen Energy Scientific Conference (TESC 2025)

5 June 2025, Ashgabat, Turkmenistan

International Scientific and Practical Conference

“Environmental Aspects of Implementing Innovative Technologies in the Development of Hydrocarbon Fields”

400 delegates from 30 countries (side event: two round tables 50 delegates each)

The conference brought together representatives of Turkmen state institutions, international energy companies, academic experts, and financial organizations to discuss environmental aspects of energy development.

Key topics included:

- environmentally responsible hydrocarbon development
- innovative technologies in oil and gas operations
- methane emissions monitoring and reduction
- international cooperation on sustainable energy development

Turkmenistan continues to implement national environmental initiatives including large-scale afforestation programs, land reclamation projects, and efforts to combat desertification.

Oil & Gas of Turkmenistan (OGT 2025)

24 October, 2025, Ashgabat, Turkmenistan
International Conference & Expo 30th Anniversary

Around 200 delegates from 30 countries
(two side events – round table discussion)

Technical Conference

“Operation of Wells in Mature Oil
and Gas Fields, Market Dynamics,
and Emissions Management”

24 October 2025

Ashgabat, Turkmenistan

This technical conference provided
a platform for professional dialogue
on operational, technological, and
strategic developments within the oil
and gas sector.

Key themes included:

- maximizing production efficiency in mature oil and gas fields
- technological innovation in well operations
- global oil and gas market dynamics and outlook
- emissions management and sustainable operational practices

The event brought together international operators, service companies, technical experts, and government representatives.

Professional Training Programs

In addition to venue services, ATC offers **specialized professional training programs designed for engineers, managers, and technical specialists working in the energy sector.**

Our training programs integrate **international industry practices with practical sector expertise**, supporting professional development across the energy value chain.

Training Calendar – 2026

Upstream & Technical Training

- Kingdom Software for Geoscience Interpretation – 3 Days
- Gas Compressor Units: Commissioning and Operations – 7 Days
- Methane Emissions Detection and Management – 5 Days

Strategy, Finance & Management

- Contract Negotiation Strategy – 7 Days
- Investment Fundamentals for Oil & Gas Projects (Pre-FEED to FID) – 5 Days
- Project Finance Management – 5 Days
- Management Skills Development for the Oil & Gas Industry – 10 Days

Market Intelligence, Language & Digital Skills

- Global Oil & Gas Market Dynamics – Executive Session
- Professional English for the Oil & Gas Sector – Year-round
- Digital Skills and Computer Literacy – Year-round
